

Pavel Usanli

Software Engineer Specializing in Java

📍 Sofia City, Bulgaria ✉ pavel.usanli@gmail.com ☎ +(359) 887 731 472

SUMMARY

I'm a **Software Engineer** with a focus on **Java**, passionate about **automation and building** complete, reliable systems. I enjoy developing and maintaining **end-to-end solutions**—from **backend** services and **APIs** to **frontend** features, **infrastructure**, and **CI/CD**. While **Java** is my main language, I also love working with **JavaScript** and **Python**, and I'm always experimenting with new tools and approaches to deliver practical **business value**.

EXPERIENCE

Software Engineer

[foryouandyourcustomers](#)

Sofia (Full-time, June 2020 - Present)

As a Software Engineer, I develop **microservices** in **Java** and **Kubernetes**, ensuring clean, secure, and maintainable solutions.

- Designed, **developed**, and deployed **microservices** and **data transformation** applications using **Java** and **Kubernetes**.
- **Collaborated** with Product Owners to refine PBIs, clarify scope, and ensure readiness and alignment with **product goals**.
- Reviewed code and approved **Pull Requests**, ensuring **code quality**, security, and adherence to engineering standards.
- Implemented **unit tests** and test cases, supporting reliable releases and stable **production systems**.
- Proposed and documented **architectural improvements** and best practices to maintain a clean and **scalable** codebase.

Remote (Part-time, January 2022 - Present)

As a Software Engineer with expertise in **AWS**, **Microservices**, and **CI/CD** pipelines, I am responsible for the **design, implementation**, and **maintenance** of highly **scalable** and secure **cloud infrastructure**. My core responsibilities includes:

- Designed, implemented, and **maintained scalable** and secure **cloud infrastructure** using **AWS** and **Terraform**.
- **Developed** and deployed **microservices** and integrated them with databases and **third-party APIs**.
- Wrote and **maintained CI/CD** pipelines using **GitLab CI/CD** and **Jenkins**.
- **Monitored** and **debugged cloud infrastructure** and services.
